IoT LiDAR
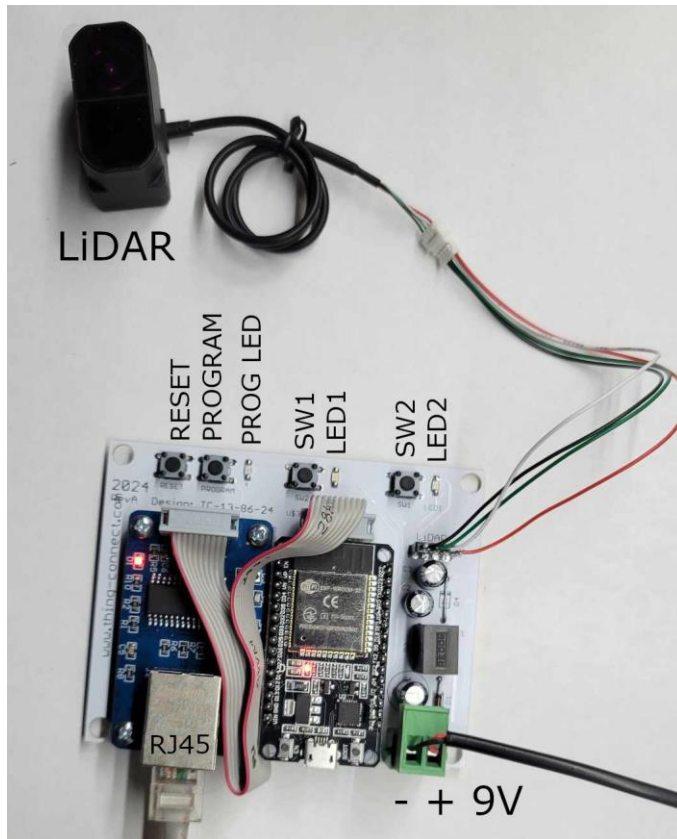

Features:

- Static IP through RJ45 connection or WiFi connection to local network
- Connect to and Andriod or Apple Phone in a Captive Web Page
- Bidirectional communication between IoT and Web Browser
  - Two LEDs on the PCB reflect the switch settings in the Web Browser
  - Two Switches on the PCB will show on the Web Browser
  - This IoT project is equipped with a LiDAR that has 1cm resolution over a distance of 12 meters

Note: On an Apple Phone you may need to enter http://8.8.4.4 to connect.
